Summary

Front-end web developer leveraging an IT and AV background to build a more intuitive user experience on the web. Recently earned a certificate in full stack development from the University of Adelaide, with newly developed skills in responsive web design, CSS, Bootstrap, JavaScript,JQuery, Ajax and Base64.js. Innovative approach towards developing apps, with a focus on practicality and future growth. My aim for each web development project I work on is to deliver a product to my audience that improves their user experience and productivity.

Successfully applied aspects of UX and agile development in a web developer project to deliver a font and colour selector UI to new web design students.

I am highly motivated to help others to gain the skills necessary to achieve their own goals by inspiring others to develop long term goals and work systematically towards them.

A lateral and forward thinker utilizing skills to bring cohesive solutions to the corporate business and not-for-profit sectors.
